Didi (Adrien) is a pixel artist from Rio De Janeiro, Brazil. As of 2019, they've been working in pixel form for 4 years, though they additionally do hand-drawn animation and some 3D modelling. They speak English, Portuguese, and French. They describe their style as *"Still [developing] it, but mostly 16px characters with chibi style"*, with a strong influence from game art, though they list Crown0 as their favorite pixel artist. They work with few colors, though these are fairly saturated.

"If you need, take, if you can, give."
